ACNA

AUSTIN · HOUSTON · DALLAS

BUILD IT RIGHT. KEEP IT RIGHT.

Your Facility Changed. Did Your Records?

Find the gaps that cost you in compliance, safety and efficiency, before an inspector, insurer or failure does.

COST IMPROVEMENT PROGRAM

Review. Plan. Fix. Decide at every step.

1 NO COST

Records review

Send your records and utility bills. We flag mismatches and signs of waste, with what each costs.

2 FIXED FEE

Site walk and fix plan

We confirm what is installed and rank every fix by cost and risk. Fee quoted first.

3 PRICED PER FIX

Delivery of the fixes

We permit, build and close out the fixes you approve, with licensed partners.

WHAT A RECORDS REVIEW FINDS

Illustrative example, not client data

The paperwork, the equipment and the utility bills, read together.

ITEM	RECORDS SAY	WE FOUND	STATUS
Air handler AHU-2	Drawn in one location	Installed in another	● Records mismatch
Line 1 motor	Circuit sized for old equipment	New equipment needs more power	▲ Power mismatch
Process water	Water bills rising each month	No new load to explain it	▲ Possible leak
Equipment label	Label on file for original unit	Unit modified since	● Label out of date

Find the gap before someone else does.

Request your free records review. A person replies within one business day.

WHAT WE DO

One System for Better Project Economics.

Design, construction, verification and improvement run as one line, for manufacturing, healthcare, warehouse and data center facilities.

Cost Improvement Program Free records review, site walk and fix plan, then the fixes you approve.	**Field verification** Confirm what is installed against your records. Available on its own.	**Field evaluation and labeling** Unlisted or modified equipment, with NRTL partners. Available on its own.
Engineering coordination Designs sealed by licensed Texas PEs at partner firms.	**Facility utilities** Mechanical, process water and compressed air, sized to demand.	**Electrical** Power and controls by licensed electrical contractors.
General contracting Fit-outs, equipment installs and modifications, permit to closeout.	**Permits and approvals** Applications, plan review, certificate of occupancy and inspections.	**Safety and EHS** EHS programs, site safety oversight and code reviews.

ONE CONTRACT. ONE ACCOUNTABLE TEAM.

ACNA runs

- Scoping, field verification and the fix plan
- Permitting and approvals
- General contracting and project management
- Safety and EHS oversight

LICENSED FOR EACH SCOPE

Partners, under our management

- Engineering and PE seal, by licensed Texas PEs
- Electrical work, by licensed electrical contractors
- Fire sprinkler and mechanical specialty trades
- Field evaluation, with NRTL partners

Start With What You Have.

Send your drawings, permits, equipment list and utility bills for a free records review. A person replies within one business day.
